## 1. Overview of Operating Results, etc.

### (1) Overview of operating results for the fiscal year ended December 31, 2025

On January 1, 2025, the Company succeeded the Internet Infrastructure business and the Online Advertising & Media business from GMO Internet Group, Inc. through an absorption-type company split and changed the company name to GMO Internet, Inc. ("Absorption Split"). Under the corporate slogan "Internet for Everyone," we provide the Internet Infrastructure business succeeded from the GMO Internet Group, Inc. while continuing to engage in the Online Advertising & Media business we have previously provided.

As a result of the Absorption Split, net sales, operating profit, ordinary profit and profit attributable to owners of the parent for the fiscal year ended December 31, 2025 have significantly changed from those for the fiscal year ended December 31, 2024.

Also, as released in the "Notice of Acquisition of Shares and Assignment of Claims Involving Change of Subsidiary" dated March 21, 2025, the Company acquired shares of overseas subsidiaries from GMO Internet Group, Inc. on March 31, 2025 ("Acquisition of Overseas Subsidiaries") and included nine companies in the scope of consolidation from the fiscal year ended December 31, 2025.

And following the Absorption Split, effective January 1, 2025, the segmentation of the reportable segments has been changed to "Internet Infrastructure business," "Online Advertising & Media business," and "Other." In addition, the business results of nine companies included in the scope of consolidation through the Acquisition of Overseas Subsidiaries are included in the Internet Infrastructure business from the fiscal year ended December 31, 2025. Year-on-year changes (in amounts and percentages) for segment sales and profit are not presented as the comparison with the fiscal year ended December 31, 2024 is difficult.

In the Internet Infrastructure business, one of our business domains, we believe our business opportunities are expanding more than ever due to factors including the continued spread of the Internet, the progress of Digital Transformation (DX) and the spread of online consumption, as well as the growing use of AI and the related need for high-performance computing capabilities in recent years.

In the online advertising market, advertising expenses in fiscal 2024 reached ¥3,651.7 billion, up 9.6% year-on-year, surpassing advertising expenses of the four major mass media channels and accounting for 47.6% of the total advertising expenses (research by DENTSU INC.).

For the fiscal year ended December 31, 2025, while stock-model revenue from the existing businesses in the Internet Infrastructure business continued to grow steadily, GPU hosting service "GMO GPU Cloud," a new business launched in November 2024, achieved profitability on a standalone basis in the three months ended December 31, 2025 as its earnings structure stabilized following the up-front investment in the ramp-up period. In the Online Advertising & Media business, sales and profit decreased mainly due to the growing trend of advertisers shifting their marketing operations in-house, but both recovered as a result of restructuring of our organizational structure.

As a result, for the fiscal year ended December 31, 2025, the Group recorded net sales of ¥78,548 million (up 504.3% year-on-year), operating profit of ¥8,224 million (operating profit of ¥139 million for the fiscal year ended December 31, 2024), ordinary profit of ¥8,345 million (ordinary profit of ¥151 million for the fiscal year ended December 31, 2024) and profit attributable to owners of the parent of ¥5,563 million (loss attributable to owners of the parent of ¥4 million for the fiscal year ended December 31, 2024).

Business results by segment are as follows.

1) Internet Infrastructure business

The Internet Infrastructure business provides infrastructure-related services that are persistent and essential in using the Internet. Main products include “domain” that functions as an address on the Internet, “servers” to store data, and lines and providers to connect to the Internet. “GMO GPU Cloud,” a new GPU hosting service that provides a development platform for AI and machine learning launched in November 2024, is also included in this segment.

All of the Internet Infrastructure businesses succeeded from GMO Internet Group, Inc. are included in this segment. Also, as stated above, the nine companies included in the scope of consolidation through the Acquisition of Overseas Subsidiaries are included in this segment from the fiscal year ended December 31, 2025.

For the fiscal year ended December 31, 2025, while sales and profit from the existing businesses such as domain, servers and Internet access continued to grow steadily, “GMO GPU Cloud” achieved profitability on a standalone basis in the three months ended December 31, 2025 as its earnings structure stabilized following the up-front investment in the ramp-up period.

As a result, the Internet Infrastructure business posted net sales of ¥65,993 million and segment profit of ¥8,631 million.

2) Online Advertising & Media business

“Online Advertising & Media business” is engaged primarily in online advertising agency service such as sales of advertising products and management and operation of advertising offered, provision of ad servicing platforms including “GMOSSP” with the largest connections in the industry, and Internet media operations including operation of our own web media and provision of associated tools.

The Online Advertising business and Internet Media business operated by the consolidated group of former GMO AD Partners are included in this segment, and the Online Advertising & Media business succeeded from GMO Internet Group, Inc. is also included in this segment.

For the fiscal year ended December 31, 2025, sales and profit decreased mainly due to the growing trend of advertisers shifting their marketing operations in-house, but both recovered as a result of company-wide efforts to optimize the organizational structure, including the reallocation of personnel to the Internet Infrastructure business.

In addition, due to the aforementioned business succession from GMO Internet Group, Inc., both sales and profit increased compared to the fiscal year ended December 31, 2024.

As a result, the Online Advertising & Media business recorded net sales of ¥13,166 million and segment profit of ¥201 million.

##### Basic policy on profit sharing and dividends for the current and next fiscal years

The Group recognizes returning profits to its shareholders as one of its important management issues, and its basic policy has been to achieve a consolidated payout ratio of 50% while comprehensively taking into account business results for each year, enhancement of its business structure and future business development.

In the fiscal year ended December 31, 2025, we raised the target consolidated dividend payout ratio to 65% to further enhance returning of profits to our shareholders while maintaining stable financial foundation.

For the frequency of dividends, our basic policy was to pay dividend annually with a general meeting of shareholders as a decision-making body. However, with an aim to implement capital policy speedily and flexibly and return profits to shareholders speedily, we began paying quarterly dividend with record dates of March 31, June 30, September 30 and December 31 every year from the fiscal year ended December 31, 2025.

Under this policy, we plan to pay ¥20.26 per share as the annual dividend for the fiscal year ended December 31, 2025.

Under the above basic policy, for the fiscal year ending December 31, 2026, we plan to pay an annual dividend, including quarterly dividends, of ¥14.00 per share. In addition, we will also pay a commemorative dividend of ¥7.51 per share, based on the dividend payout ratio of 35%, to express our appreciation to our shareholders in conjunction with the restructuring. As a result, the total annual dividend for the fiscal year ending December 31, 2026 will be ¥21.51 per share.

## 2. Basic Policy Regarding Choice of Accounting Standards
