 Corporate website: <https://internet.gmo/en/>

Notice Concerning Compliance with Listing Maintenance Standards (Completion of Compliance with All Continued Listing Criteria for the Prime Market)

GMO Internet, Inc. (the "Company") previously disclosed its plan to meet the listing maintenance standards in the "Notice Concerning Plan to Comply with Listing Maintenance Standards (Entering Improvement Period)" dated March 9, 2026. The Company hereby announces that it has received a "Compliance Determination Notice" regarding the listing maintenance standards (distribution standards) from Tokyo Stock Exchange, Inc., and as of April 28, 2026, it has met all the listing maintenance standards for the Prime Market of Tokyo Stock Exchange, as detailed below.

1. Status of Compliance with the Listing Maintenance Standards

The Company's status of compliance with the listing maintenance standards for the Prime Market of Tokyo Stock Exchange is as shown in the table below. As of the end of December 2025, the Company did not meet the standard for the tradable share ratio. However, as a result of initiatives based on the plan for compliance with the listing maintenance standards, the Company met the standard as of April 28, 2026. Consequently, the Company now complies with all items of the listing maintenance standards for the Prime Market of Tokyo Stock Exchange.

Item		Number of Shareholders	Number of Tradable Shares	Market Capitalization of Tradable Shares	Ratio of Tradable Shares
Listing Maintenance Standards (Prime)		800 or more	20,000 units or more	10.0 billion yen or more	35.0% or more
Status of the Company*1	As of Dec. 31, 2025	25,335	212,614 units	18.6 billion yen	7.7%
	As of Apr. 28, 2026	Compliant	Compliant	Compliant	41.5%
Compliance Status*2		—	—	—	Compliant

*1 The Company's compliance status is calculated based on the distribution status of the Company's share certificates, etc., recognized by the Tokyo Stock Exchange as of the record date.

*2 Only the ratio of shares in circulation that did not meet the requirements as of the end of December 2025 was reviewed by the Tokyo Stock Exchange, and the results of that review are presented here.

2. Implementation Status of Initiatives to Comply with Listing Maintenance Standards

As announced in the "Notice Regarding Issuance of New Shares and Secondary Offering of Shares" dated April 10, 2026, the Company resolved at the board of directors meeting held on the same day and implemented the issuance of new shares and a secondary offering of shares. The purposes of this offering were: (1) raising growth capital for the new GPU cloud business, (2) compliance with the listing maintenance standards for the TSE Prime Market, and (3) improving liquidity and expanding its shareholder base, particularly among individual investors. As a result, the "tradable share ratio," which had previously been non-compliant, became compliant, and the Company has now met all items of the listing maintenance standards.

The Company will continue to strive for sustainable growth and the enhancement of corporate value to maintain compliance with the listing maintenance standards for the Prime Market of Tokyo Stock Exchange.

Total funds raised: 20.2 billion yen

Investment in the GPU cloud business 19.7 billion yen

Investment Progress

Completed: 10.1 billion yen

Remaining: 9.6 billion yen

Investment in Turing Inc. : **3.2** billion yen
(Resolved: March 18)

Procurement of **42** B300 units : **6.9** billion yen
(Resolved: April 10)

Additional investment planned
by December 2027

*The remaining 0.5 billion yen will be used to repay loans

Public Offering/Secondary Offering Completed
Actively pursuing M&A

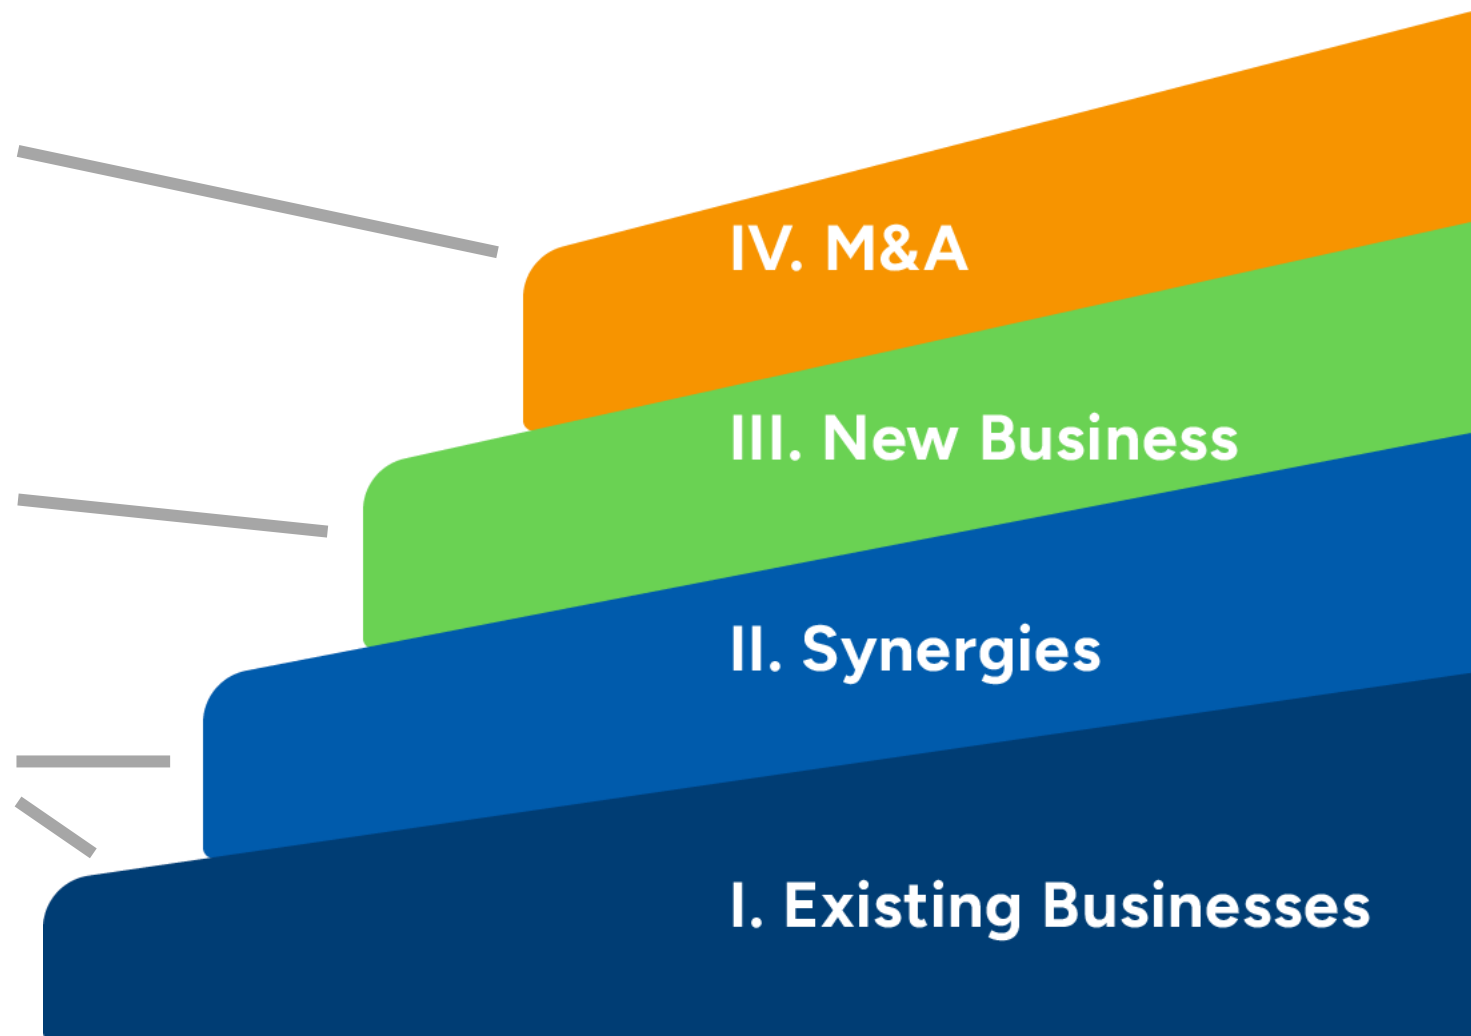

Capital policy constraints have been resolved
Agilely advance discussions and consultations

*The figures for 2024 are estimated figures assuming the current structure.

Regarding the Increase in Contract Volume Due to a Large-Volume Domain Contracts

- The number of domain contracts surged in Q3–Q4 of 2025
- The primary reason is large-scale contracts with corporations and businesses
*For purposes such as domain trading, SEO, and AIO testing, etc.
- As these are one-year contracts, we anticipate a certain degree of decline in the second half of this year
- Since this is a bulk purchase with a low unit price, the impact on financial performance will be limited.

- Apr 2026 ○ Decision Made to Invest **6.9 billion yen** in 42
B300-Equipped GPU Servers
- Continue making additional investments while
taking operational conditions into account

The remaining **9.6 billion yen** in raised funds is scheduled to be invested by December 2027

Number of Servers and Operational Status (Illustrative)

Pre-configured Slurm environment now available on B300 Cluster use enabled in addition to the bare-metal plan

Slurm: An industry-standard job scheduler for cluster systems. Provides resource allocation, job control, and monitoring functions.

Cluster Utilization: A computing environment that connects numerous GPU servers via a high-speed network to perform parallel processing as a single, powerful system.

TURING

Aiming for fully autonomous driving by 2030
AI analyzes camera imagery to perform recognition and control (end-to-end autonomous driving model)

Yu Yamaguchi, CTO, Turing Inc.

The B300 leverages its large memory capacity to utilize it for distributed training of large-scale models (VLA), which form the core of autonomous driving AI. Furthermore, since it shares an architecture with the next-generation in-vehicle chip “Thor,” we are actively working to **validate efficient training and inference methods** with a view toward future implementation. The H200 serves as a proven, stable environment, handling **routine workloads** such as the training, refinement, and validation of existing in-vehicle models. By **clearly dividing roles—with the H200 focused on the “stable operation of current models” and the B300 on the “advanced development of next-generation technologies”**—we aim to achieve both development efficiency and technological innovation.
